General Information for Our Customers.

THIS CATALOGUE is now issued to assist Customers residing beyond the Metropolitan Radius in selecting the Newest Goods, thereby extending to them all the advantages of a personal visit to our Store.

A Large Staff of Expert Assistants devote the whole of their time to the Selection of Goods Ordered by Post, and competent packers are employed in the Despatch Section. Promptitude and Efficiency are insisted upon by the Mail Order Manager.

Owing to the unsettled state of the Markets and the scarcity of Supplies, Customers are reminded that the prices quoted herein are subject to alteration without further notice.

PURCHASE CARDS.

For convenience of Customers personally patronising our Warehouses, we provide special Purchase Cards. These Cards enable Customers buying in more sections than one, to save time and trouble entailed in paying at each department, by MAKING ONE PAYMENT FOR ALL GOODS AT THE CARD OFFICE. Delivery in one lot is thus assured.

PACKING.—All Goods for despatch are packed carefully in a regular way, to meet the requirements of travel, and are delivered in good condition to the Railways Sheds, or the Wharves, AT WHIP POINT OUR RESPONSIBILITY OF EVERY KIND CEASES. Special packing, or packing for export will be an extra charge.

WHEN RECEIVING GOODS, Customers would do well to satisfy themselves that they are in good order before signing the railway receipt book. In instances where damage, etc., is suspected, the packages should be examined in the presence of the Railway Officials.

RETURNS.—We are quite willing to exchange any goods not deemed satisfactory, if returned to us Carriage Paid, within Seven Days.

WHEN RETURNING GOODS always write the Name and Address of the sender on the outside of the Parcel. ADDRESS: "FOY & GIBSON PROPRIETARY LTD., PERTH."

CARRIAGE CHARGES.—We pay freight or Postage (whichever is cheaper) on all Drapery Articles only. On all other items carriage should, therefore, be included with order when consignment is to be prepaid. In instances where packages weigh more than 14 lbs., it becomes cheaper to send by Goods Train.

Scale of Goods Train Charges up to 3 cwt. (“smalls”)

NEW — Our Carpets are the last word in Floor Coverings. When visiting Britain our Carpet Manager came into close touch with all that is praiseworthy in Carpets, and the factories whence they came, and thereby has been enabled to maintain the stock at its highest point of excellence.

EXCLUSIVE The possessor of a superior home appreciates the fact that the exquisite rugs in which she takes such pride may not be found in other homes. We, by purchasing specialities, from an extended range of British Manufactures, are enabled to guarantee clients this exclusiveness.

HISTORIC Drawn from Famous, Costly Hand-Woven Antiques, which find proud place in Palace, Cathedral, Mosque and Museum.

SUPERIOR The Finest Qualities, from the Highest Grade British Manufacturers, are our sources of supply.

KEEN — In Price because Foy & Gibson, standing high in the Commercial World, buy absolutely for cash. Purchasing more cheaply we can sell more cheaply.

We cordially invite you when in Perth to call and inspect our Carpet Showrooms—even if you do not intend to purchase—just come and examine our wonderful range of Carpets as you would the exhibits in a Museum. We await your visit confidently certain you will be pleased with our display and concede that our carpets are exquisite.

Home Beautiful!

Experts and Clients of sound judgment concur in affirming that

CARPETS

Play an important Role in the attainment of the above Desideratum.

FOY’S is the Recognised House for Quality Floor Coverings.
Grass Squares and Rugs.

This type of floor covering is especially adaptable for use in seaside or country bungalows; when purchasing for either, low cost is often a deciding factor.

Foy and Gibson’s GRASS SQUARES and RUGS meet such requirements, combined with the additional advantage that all the designs have just that artistic touch which is pleasing to the most fastidious taste.

Our Special GRASS SQUARES and RUGS are Reversible, Exclusive, Dainty, Durable and Cheap.

VELVETA UNDER FELT.

VELVETA UNDER FELT, 5ft. wide, 11d. yard. By the roll (50 yards), 44/- The Durability of Carpets and Linoleums is greatly improved by placing a layer of "Velveta" Sanitary Felt underneath. It makes Linoleums and Floorcloths resilient and silent to the tread, and gives an elasticity not otherwise obtainable. Fitting itself to the imperfections of rough and uneven floors, and acting as a cushion, it enables Floor Coverings to last much longer without showing signs of wear. And, being made sanitary by a chemical process, it checks the ravages of silverfish and moths, and is, therefore, invaluable as an undercovering for carpets. "VELVETA" LIES FLAT, REQUIRES NO TACKING, MAY BE TAKEN UP AND RE-LAIID.

The "RAND" Vacuum Cleaner, non-electric, is honestly built for everyday cleaning service and does the job thoroughly, saving time, strength and money. No cost to operate, hence no upkeep, first cost being the only cost, and this is surprisingly low. Price, £5/10/0.

The "UNIVERSAL" Electric Vacuum Cleaner is very efficient for removing both embedded dirt and surface dirt. This cleaner is just as effective in picking up threads and surface litter as a cleaner, having a brush or a brush attachment. With thread-picking, self-cleaning nozzle and all attachments. Price, £10/6/0.

The "WHIRLWIND" Vacuum Sweeper, non-electric, £5/10/0.

We also carry stocks of the M.P. Riding Motor Pusher, fitted with Ransome's Mower. Send for particulars.

19504. "Jumbo" Gasoline Engines have become the modern beasts of burden, strong, rugged, big brutes; you know at a glance that Jumbo will stand up under the most severe kinds of working conditions. You've got to respect a Jumbo Engine for its power—a smoother, more velvety type of power than you ever thought possible in a horizontal engine. The Webster Magneto furnished with every Jumbo Engine starts your engine instantly, and keeps it going constantly, no batteries required, with the hot blue spark of a Webster oscillator. Jumbo starts from the first revolution of the flywheel and runs with velvet smoothness till you shut off.
Water Cooling System.—"Jumbo" Engines all have a large cooling water-hopper. In cooling by water the most important thing is to distribute the water evenly over every part of the cylinder. The "Jumbo" Cooling System accomplishes this purpose without the use of pumps, water pipes, tanks, etc. Simplicity and efficiency are both obtained in this wonderful engine. Price, 1½ h.p., £30; 5 h.p., £50; 7 h.p., £75. Send for specifications.

19505. The "Centaur" Small Farm or Orchard Tractor. The "Centaur" is needed on every farm, large or small, 12 months in the year. It costs only a little more than a good horse and his upkeep for a year, and pays for itself on the place the first season. It cuts labour in half and increases production and profits.
On the small farm it does all of the work and turns the hard work of farming into pleasure. On the large farm it is needed for the odd jobs that the large tractor will not do and for cultivating purposes it has no equal. The "Centaur" with the riding Cultivator does as much as two horses and with less work for the operator.
The New Way Air-Cooled Motor that is used on the Centaur has been giving successful performance for over fifteen years, therefore, it is no experiment. You cannot overheat the motor in any climate under the sun, and with steady running the temperature never rises above the point of the highest efficiency. There is no radiator to leak, or water to freeze, which causes expensive repairs. Price, Tractor with Plow and Fig. 8 Cultivator Attachment, £145. Send for Specifications.

Hints for “FIRST AID” Treatment in the Event of Accident.

THE FIRST THING TO DO IN CASE OF SERIOUS ACCIDENTS IS TO SEND FOR A PHYSICIAN. IN ALL CASES CARRY OUT THE ‘FIRST AID’ TREATMENT DESCRIBED BELOW.

INSECT AND BEE STINGS.—Apply weak ammonia, oil, iodine, or salt water.

BITES OF ANIMALS OR SNAKES.— Tie cord tightly above wound; suck wound; cauterize with caustic, or cut away adjacent flesh with sharp knife. Give whisky or brandy as a stimulant.

BRUISES.—Apply warm tincture of arnica on flannel; or bathe with witch hazel. Bathing the injury in very hot water is good.

BURNS AND SCALDS.—Cover with soothing ointment; apply wet cloths. Apply white of eggs and olive oil, or olive or linseed oil, plain, or mixed with chalk or whiting. Flour, cotton or butter will answer the purpose.

CINDERS IN THE EYE.—Roll soft paper up like a lamp lighter, and wet tip with water, using it to remove cinder, or use a dropper to draw it out.

CONVULSIONS.—Loosen the clothing and give full opportunity for free breathing. To avoid injury to the tongue, put the jaws apart, and insert a twisted napkin or towel. Babies can be quickly placed in a tub of hot water, to which several tablespoonfuls of mustard have been added.

CUTS.—If an artery is severed as indicated by sports of blood, tie tightly above the wound (the handkerchief above wound, insert a stone, and twist with a stick until bleeding stops); if a vein as indicated by a slow, uniform flow of blood, tie below the wound. Bathe with equal parts of water and peroxide of hydrogen. Bind with clean bandage, or apply adhesive plaster.

HOW TO CLOSE A FRESH WOUND.—Prepare a solution of carbolic acid, half ounce to a quart of water; thread a needle with silk, wax, and place in the solution; wash your hands, the wound, and the surface with the solution. Begin at the middle to close a long wound, at one end for a short one. Insert the needle one-fourth inch from margin of edge, bring out same distance from margin of opposite edge. Cut and tie each stitch as put in. Place a pad of borated cotton on the wound, a piece of oiled paper on this, and secure with a roller bandage, or strips of adhesive plaster.

BROKEN BONES.—Support broken limb before moving; if leg, fasten to other leg at ankle and below knee; if arm, by means of a sling. Move patient gently, and use care to prevent the bone from being forced through the flesh or skin. If a physician is not at hand, set the bone, put on splints and securely bandage, but not too tight to stop circulation. Bone matter does not form until the ninth day, and the hone may be re-set, if necessary, at that time, with less suffering to the patient. Collar bone and ribs should receive immediate attention. If broken bone protrudes through flesh, the exposed fragments should be replaced only by a physician.

DISLOCATIONS.—The reduction of a dislocation calls for no immediate haste, and far less injury is inflicted if the patient be allowed to wait the arrival of a physician. Cold, wet cloths may be applied to relieve the pain.

DROWNING.—Loosen clothing if any. Lay the body on its stomach, and lift by the waist, letting the head hang down. Jerk the body a few times. Pull tongue forward with handkerchief. Induce artificial respiration—compress and expand the lower ribs about twenty times a minute. Raise the arms above head, not sidewise, and lower at the rate of fifteen times a minute. The body should be on its back with the feet higher than the head. Apply warmth and friction to extremities. Don’t give up!

FAINTING.—Place flat on back and loosen clothing; cold water to face; camphor, ammonia or salts may be held under the nose. Keep the feet warm, and place the head lower than the rest of the body.

APoplexy.—Raise the head, apply ice or cold water to it; loosen the clothing.

BONES IN THE THROAT.—If impossible to remove with the fingers, try a blunt pair of scissors or a hairpin, straightened out and bent at one end. Induce vomiting by placing forefinger on root of tongue or get on hands and knees and cough. A piece of candy may be dissolved by sipping hot water. If an article be completely swallowed, do not give a purgative, but let the bowels alone for a day or two, and give plenty of bread, rice or other solid food, so that the article may be passed off without injuring the intestines.

HEAT PROstration.—Place on back with head level with body; loosen clothing. Apply heat to the body, and to the head and feet. Bathe the face with warm water. Don’t give alcoholic stimulants.

SUNSTROKE.—Remove patient to shady place, loosen clothing, apply ice or cold water to face and neck; sponge body with cold water.

STRIKED BY LIGHTNING.—If the muscles of respiration are temporarily paralysed, the same means for recovery should be used as in apparent death from drowning. Place the person in a current of fresh air, and dash cold water upon the face, neck and breast. Apply friction if the body be cold.

HICCOUGH.—Take a drink of water and swallow while closing the ears; or, take a deep breath and hold it as long as possible. In severe cases, apply mustard plasters, hot vinegar, brandy or whisky over the stomach.

FIRE IN ONE’S CLOTHING.—Don’t run, no matter where you are. Roll on carpet or wrap in rag or blanket; keep head down to avoid inhaling flames.

FIRE IN THE BUILDING.—Crawl on floor, cover head with woollen wrap, wet, if possible, and holes for eyes.

FIRE FROM KEROSENE.—Don’t use water; it will spread the flames; use dirt, sand or floor as an extinguisher, or smoother with woollen rug, etc.

LIME IN THE EYE.—Use a lotion of sugar and water, or vinegar and water.

SUNBURN.—Bathe the affected part with linseed oil and lime water. If this remedy is not handy, treat the sunburn the same as “Burns and Scalds.”

REMOVING A BUTTON FROM A CHILD’S NOSE.—Hold a pinch of snuff or pepper close to the nose. Sneezing should follow dislodging the button. Tickling the nose with a feather should produce the same effect.

Poisons and their Antidotes.

Send for Physician; while waiting, carry out these first aids. Induce vomiting—stick a finger down throat past palate. Give emetic, teaspoonful of mustard in cup of lukewarm water, follow with copious draughts of warm water to empty the stomach. Give whites of eggs. Antidotes should be given in large doses.
